This is a great function to have and guarantees that users cannot access other computers whenever they would like without permission. We do not look at tradition, advertisers or anyone else; We work for our readers and readers alone. Even better, you can access printers from the connected PC and print them somewhere else. View file and images, play, download content and make more changes: Total control is in the palm of your hand, or rather, on the screen. You could call it and accompany it through everything as if you had a thousand times before, but it doesn't even know the names of the functions or basic actions, such as "internet browser", "toolbar" or even "bar addresses".
